What is ActivAll?

ActivAll is a high-impact reaction wall designed for fitness, health, and fun. It encourages communication, enhances focus, and develops behaviour. Additionally, it also challenges users' physical and cognitive abilities, motivating them to exercise more often and for longer durations.

Hailed as "The Gamification of Exercise", ActivAll interactive system is a catalyst that gets people involved in exercising regardless of their age or fitness abilities.

The ActivAll is suitable for:

General Fitness

Sports Center

Disabled

Senior, Elderly

Children

Program Benefits

Core strength

Teamwork

Balance

Cardiovascular

Memory

Stamina

Reaction Speed

Hand-eye coordination

Concentration

Fitness

ActivAll is designed to improve an individual's health, fitness levels, coordination, and general well-being for all ages and abilities

Benefits

FULLY INCLUSIVE

Enables people with or without disabilities to benefit from a full body workout.

EASY TO USE

Simple to use with games that are easy to understand. ActivAll is suitable for people of all ages and abilities.

QUALITY BUILD

A robust, compact design, built with high quality component and curved casing for safety.

HUGE FITNESS BENEFITS

Unique programs which engages multiple muscle groups; enhance core, upper and lower body strength, and endurance.

COMPETITIVE

Challenge yourself or others to beat your top score. ActivAll motivates you to try harder, pushing yourself that little further.

COMPACT DESIGN

Only requires a small setup space.

ActivAll has developed programs tailored towards each individual's abilities, with programs designed to train and improve sensory development. ActivAll is also suitable for adults and children with special needs who may sometimes encounter restrictions in their participation in physical activities.

“Being in better physical shape means they can enjoy playing with their grandchildren when they come to visit.”

LEAH JACKSON
Wellness Navigator, UK

Why ActivAll?

Stimulate Age-Related Care & Dementia

ActivAll stimulates patients' mental health by improving self-esteem & interpersonal relationship.

Engage Body & Mind

It is crucial to keep physically active as we age. Studies have shown that an individual's mental, cognitive and functional health improves even with a few minutes of appropriate exercise each day. ActivAll makes it easier for the elderly to keep physically active by carefully combining games with exercise, mixing sociability with gentle competition and ultimately, adding the element of fun to exercising.

Case study

A study conducted in an elder care centre, Vitalia Ferraz, in Madrid, Spain, showed that ActivAll helped reduce pain and rigidity in people living with Parkinson's, stimulates mental attention in Alzheimer's patients, and increases motivation in stroke patients to exercise affected areas.

Inclusive Design

ActivAll helps people of all ages and abilities to enjoy physical activities. The system can provide a full-body workout with sensory and audio features to help stimulate and motivate players. Being fun to use, it engages everyone in daily moderate-to-vigorous physical activity, which is consistent with recommendations for obesity prevention. Programmes can be tailored towards each individual's abilities, with sensory and ability options available to help permit exercise and fitness for the less abled.

"It engages and helps (a pupil with challenging behaviour) burn off some energy in a more structured way as a sensory break in between adult led activities."

JULIE STEWART

Head Teacher, United Kingdom

"What a fantastic opportunity for our children to improve their gross motor skills, fine motor skills and hand-eye coordination and team bonding."

CHRIS WILSON

Head Teacher, United Kingdom

Improve Hand-Eyes Coordination

ActivAll perfectly caters to people of all physical levels and has shown to improve hand-eye coordination, which is vital in so many different areas of life from writing, reading to daily tasks such as tying shoelaces. In addition, participants can improve agility, reaction, and balance with different gameplay and difficulty levels.

Sensory Stimulation

ActivAll interactive board is also designed with the idea of sensory stimulation. All of ActivAll boards are equipped with sound, LED score board and many touch-sensor pods that will illuminate during game play. All of these elements stimulate the senses of the user's touch, hearing and sight. The board is definitely a perfect remedy to aid children and elderly who requires sensory training.

Improves Fitness

ActivAll board is an excellent product that provides participants with full bodywork within a small area. It has multiple tailored programs that engage various muscle groups - enhances core, upper and lower body strength and endurance. A short 5min workout with the system will ensure you break a sweat out! It is suitable for all ages, especially for children and the elderly, to promote a healthy lifestyle.

ActivAll Design

ActivAll Board is carefully designed with meticulous engineering processes to ensure all ActivAll products are hassle free, and are fully warranted.

Our products are extensive used by

Game Programme

ActivAll Board comes with four unique programs designed to improve fitness and sensory development while making exercise fun!

ClearOut

 Available in multiple players

Clear Out aims to train balance & speed. The objective is to clear as many illuminated pods as possible within the time limit. The time limit is adjustable.

Benefits

CardioBeat

 Best for Single player

CardioBeat aims to train cardiovascular health, balance and speed. Similar to a beep test, speed increases along with difficulty levels. The objective is to clear the entire wall of illuminated pods as many times as possible.

Benefits

Training Benefits

ClusterShot Available in multiple players

ClusterShot aims to train agility and speed. The objective is to earn as many points as possible by clearing out the illuminated pods within the time limit. Different coloured pods carry different scores. Generally, the more green pod cleared, the more point earned. The difficulty of ClusterShot is based on the transition time between each illuminated pods.

Come in three levels of difficulties based on pod illumination speed and changes in colour transition.

Benefits

Chaser Available in multiple players

Chaser aims to train agility and speed. The objective is to hit out the single random illuminated red pods when they appear anywhere within the time limit. The more red pods hits, the more points you earn.
