

Play your way to recovery

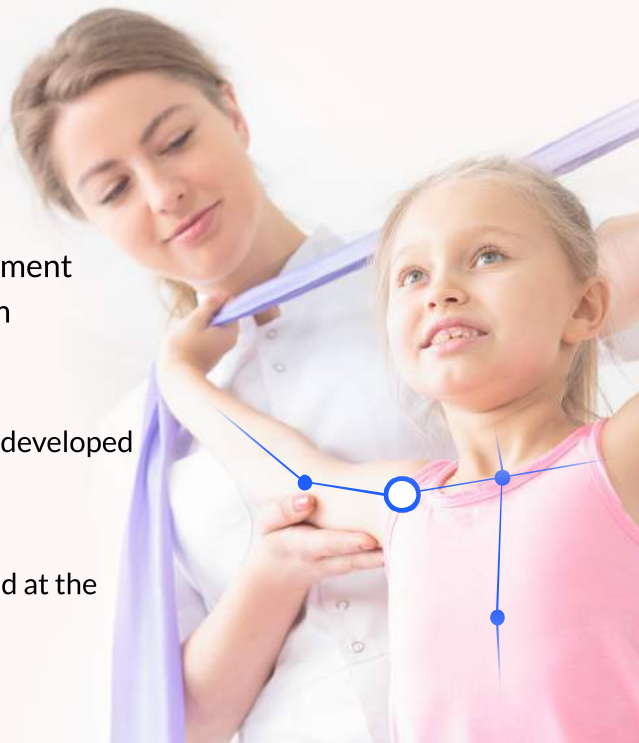

MIRA is a medical device that uses motion tracking sensors to **gamify physical therapy and increase patient compliance.**

MIRA uses *patient motion tracking sensors*

MIRA contains over 450+ exergames, along with assessment tools, cognigames and custom exercises.

- ✓ Rich content designed and developed based on clinical input
- ✓ Secure and reliable
- ✓ Usable both at the clinic and at the patient's home

MIRA has the potential for patients to be more active in their rehabilitation, which should result in improved patient and service outcomes.

*Mark McGlinchey, Clinical Specialist Physiotherapist,
Guy's & St. Thomas' NHS Foundation Trust, London*

CE 
Class I Medical Device

30,000+
rehabilitation sessions with MIRA
in over 80 clinics, hospitals,
institutions and care homes
