USER'S SAFETY AND COMFORT FROM LONG TERM CARE BED

The physical health and psychological well-being are hot topics for elderly people. Safety is an important quality feature for a nursing bed. Beds' systematic fall prevention can reduce the risk of falling out of the bed.

Our innovative solutions can reduce falls as well as the consequences associated with falls. It is a wonderful match of safety, mobility, height adjustable and coziness. All these features cater to the needs of people who are spend a lot time in bed. The adjustability makes beds more appropriate than a standard bed for providing comfortable support and enabling caregivers to deliver quality care.

SAFETY FIRST

Good night, better days

IEC60601

Safety standard

Follow IEC60601 Safety Standard, 3200 times cycle tests were carried out with a maximum safe load of 250kg.

1 No Protection Needed

Comfort Bed with no side rails.

2 Soft Protection

Mobilization aid, 3/4 length side rails from head end.

3 Head and Foot End Protection

4x 1/4 length side rails that conform with bed platform adjustments.

4 Fully Enclosed Protection

2x 1/4 length side rails and 2x 3/4 length side rails for a fully enclosed bed layout.

Safety labels

There are sufficient warning labels on the bed, indicating anti-pinch and potential risks and injuries.
