# ABOUT US

Tata Surgical was established in 1984 and started manufacturing of re-usable medical instruments at small scale with skillful workers. Due to production of high quality surgical and dental instruments, soon it becomes popular among the potential buyers of Europe; England, Germany, France, Spain, Holland, Switzerland and Italy.

Tata Surgical rapidly grew and gained a good name among those countries with better quality, competitive prices and reliable delivery services.

In 2005, Tata Surgical started producing single-use surgical instruments as well and become a popular company among the suppliers of SU instruments to Europe. Tata surgical got its CE certification of Class IIa & IIb from BVQI and then SGS UK.

In 2010, Tata Surgical started production of electro-surgical instruments, bipolar, mono-polar forceps and electrodes, disposable and re-usable with good quality.
