

Volumetric Flask

DIN
12600

DE-M

Volumetric flasks made from Borosilicate 3.3 glass provide high chemical resistance and optical clarity, ensuring reliable performance and visibility. Each flask undergoes inspection using four stress viewers to guarantee quality and durability. Available in Class A and Class B standards, the flasks can include individual certificates with QR codes or batch certifications to suit various needs. Engineered for precision and performance, these flasks deliver consistent and accurate results in every application.

Wall strength/thickness

Product safety, durability, and compliance with ASTM/USP(DIN ISO 1042) standards are ensured through precise measurement checks with gauges and calipers, annealing in conveyor lehrs to eliminate manufacturing stress, and testing glass thickness for optimal wall strength.

Print color adhesion test

The printed markings on the glass are tested for color adhesion through rigorous acid boiling, scratch, and tape peel-off tests. The optical clarity of each product is also verified twice, first during production and then before packaging, to ensure 100% quality and precision.

Fit testing of mating joints

The taper of cones and sockets is verified using gauges and taper test tools to ensure secure joints. Mating joints undergo vacuum testing to confirm even tapering and eliminate leaks.

Traceability (QR code) **DE-M**

Each piece is calibrated at 0.003% accuracy with A-class tolerance. They are accompanied by individual calibration certificate, in accordance to German DE-M standard. In addition, Glassco collaborates with CaliberLIMS through its QR-LabGlass™ Smart Flask, which features unique scannable QR codes for streamlined traceability of certification. This integration allows users to quickly access, download, and print specific glassware certificates through CaliberLIMS software, simplifying the retrieval and maintenance of certification records while ensuring compliance and easing audit processes.

Ordering Information

Example
 Ordering Code:
CAAI-020016-W-PE-RC-Q

Stopper Type
 PE = PE

Stopper Size
 16 = 16

Color of Label (optional)
 RC = Red

Colour of Glass
 C = Clear

Type of Certificate
 I = Individual certificate

QR Code (optional)
 Q = QR code

Class of Glass
 A = Class A

Standards
 A = ASTM E-288

Capacity
 0200 = 200 ml

Colour of Printed Marking
 W = White Print

Table 1: Neck Size (N/S) for USP (DIN ISO 1042)

Ordering Code	N/S	Capacity (ml)												
		5	10	20	25	50	100	200	250	500	1000	2000	5000 ⁽¹⁾	
10	10/19	S	S	S	S
